Masking harms

Another important article from Biologyphenom

Once again we direct our readers to the work of [Biologyphenom](#), whose diligence in bringing the Scottish Covid-19 Inquiry revelations to the public is nothing short of outstanding (as reported previously [here](#) and [here](#)).

Biologyphenom's recent article, [Harms from mask wearing](#), reveals the truth about the consequences of the masking policy that was enforced upon the population, from children to the elderly and everyone in between.

Regular DoD readers will already be aware of our campaign against [Dumfries & Galloway Council's mask policy](#) within D&G schools, leading to the council's capitulation in black and white, officially admitting via the Scottish Information Commissioner that they had no authority to impose such measures on [other people's children](#).

Biologyphenom's 24th November submission adds significant weight to a cause close to the heart of DoD and all who follow our work.

To quote from his article:

Yet more truthful testimony from the Scottish COVID inquiry covering the period from 2023 to 2024 detailing out serious mask harms inflicted upon healthy people, healthcare workers, the elderly, young children and infants.

- *Extreme sinusitis*
- *Severe skin inflammation*
- *Communication difficulties*
- *Young people needing to lip read becoming withdrawn*
- *Speech and language development in young children stunted with wait lists for therapy now a public health crisis.*

The video compilation that follows is well worth 12 minutes of your time.

What makes Biologyphenom's exemplary work all the more important is the absolute guarantee that our public servant overlords within the Scottish government - who love you, care about you, always tell the truth and do not tell lies - will do their level best to keep this information from the public, but will instead double down on masking the pitifully compliant Scottish population, regardless, if and when the time comes.

We strongly recommend subscribing to [Biologyphenom's Substack page](#).

Never forget what they did

Scottish Covid Inquiry documents horrific abuse - with zero press coverage

Question: When would mainstream media outlets bury their head in the sand and miss the opportunity to report on world-shattering revelations exposing deadly, systemic abuse and institutionalised corruption, such as

- Fatal medical protocols targeting the vulnerable and the elderly
- Faking death certificates
- Placing patients on Do Not Resuscitate orders against their families' wishes
- Neglecting, starving and dehydrating vulnerable patients to death
- Isolating and imprisoning patients for an entire year
- Hastening death with end of life pathway protocols

Never forget what they did

Question: When would mainstream media outlets bury their head in the sand and miss the opportunity to...
