## Never forget what they did

Scottish Covid Inquiry documents horrific abuse - with zero press coverage

Question: When would mainstream media outlets bury their head in the sand and miss the opportunity to report on world-shattering revelations exposing deadly, systemic abuse and institutionalised corruption, such as

- Fatal medical protocols targeting the vulnerable and the elderly
- Faking death certificates
- Placing patients on Do Not Resuscitate orders against their families' wishes
- Neglecting, starving and dehydrating vulnerable patients to death
- Isolating and imprisoning patients for an entire year
- Hastening death with end of life pathway protocols
- Inappropriate, absent or delayed medical attention
- Refusing treatment
- Hospital staff overriding power of attorney
- Visits denied
- Dying alone

Answer: when it's the Scottish Covid Inquiry.

Evidence of these atrocities and more has been revealed during the inquiry since it began in July 2023, yet the mainstream media has been strangely silent. Below is a photo of the press seats on the day of the testimony chief executive of Scottish Care Dr Donald Macaskill, a scene described as “[missing in action](#)” by investigator [Biologyphenom](#), who has been documenting the entire inquiry on his [Substack page](#) from the beginning. He was also documenting the event on Twitter but has had his account deleted - no doubt for breaching “community standards”, the highest of accolades in these warped times.

Also concerning is the fact that most of the so-called ‘alt media’ channels seem to have turned a blind eye to the inquiry’s shocking revelations, lending credence to the sometimes over-used term ‘controlled opposition’ - “If there’s one thing I do not like it’s being the only guy in the world that appears to have an interest/view on it all” Biologyphenom told DoD.

DoD salutes Biologyphenom for his incredible work and strongly recommend his [Substack](#). The testimony makes for harrowing viewing and exposes the mentality, the inhumanity and the depths to which people in alleged authority and positions of supposed ‘care’ were willing to stoop, as well as the physical and mental torture they were eager to inflict on others under the mantra of ‘just following orders’.

This is perhaps the most shocking lesson that the inquiry’s revelations teach us - that certain unspeakable atrocities that ought to have been permanently consigned to the past are but one melodramatic, contrived, propagandised headline away from being repeated on our own shores.
